DO BRASIL AO MUNDO

Catharina Sour (X4) aparece com os demais estilos locais do Apêndice B. Esses códigos X não são novas categorias numeradas. A tabela não acrescenta estilos provisórios posteriores à edição de referência.

COMO LER

ABV: álcool em volume (%). IBU: referência de amargor; não equivale, sozinho, ao amargor percebido. SRM: escala de cor. As cores das fichas distinguem grupos, não a cor do líquido.

var.: sem faixa numérica única; consultar o tipo, o estilo-base e as regras da categoria. As siglas centrais são recursos visuais criados para este pôster.

EXCEÇÕES E ESCOPO

* Saison (25B): ABV 3,5-5% (mesa), 5-7% (padrão) e 7-9,5% (super). SRM 5-14 (clara) ou 15-22 (escura). A ficha apresenta os extremos das variantes.

Disposição inspirada na tabela periódica, sem significado químico. Grupos editoriais; os códigos preservam a referência ao guia. As faixas não substituem a descrição sensorial.
